Information systems

Repremundo development that allows:

- A two-way communication channel with the customer.
- Real-time reports.

It is powered by 4 information systems.

WMS Specialized for control of operations in distribution centers.

Specialized system for the management of Free Trade Zone and enabled Warehouses that contains an integration with the DIAN systems as Siglo XXI / Muisca.

Visualization of the status of international cargo operations 24 hours a day: it is visible, flexible, manages alerts in all states such as delivered, received loaded traffic.

Platform in which all the information regarding the dispatch, operational and administrative monitoring for each of the land freight transport operations is consolidated.

App Repremundo:

- High availability of information.
- Agile and efficient communication.
- Status, progress, critical points of each operation.
